SUMMARY

Full Stack MERN Developer skilled in building REST APIs, MongoDB schemas, and responsive React frontends. Experienced with IoT-integrated systems and React Native mobile apps. Seeking a Full Stack Intern role to contribute and grow.

EDUCATION

Guru Gobind Singh Indraprastha University (GGSIPU)

B.Tech in Information Technology | CGPA: 8.62

New Delhi, India

2022 – 2026

BMSBM Sr. Sec. School

Class XII | 90.20%

New Delhi, India

2021

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Middleware, MVC Architecture

Database: MongoDB, Mongoose ODM, Schema Design, MySQL

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Component Architecture

State Management: React Hooks, Context API, Redux (familiar), Axios / Fetch

Tools: Git, GitHub, Vite, Postman, VS Code, npm, Render, Vercel

PROJECTS

Parklith – IoT-Based Smart Parking Management System | *MERN, React Native, ESP32*

May 2026

- Engineered an end-to-end IoT parking system — interfaced waterproof ultrasonic sensors with an ESP32 microcontroller to detect real-time slot occupancy and transmit data to a Node.js/Express backend via HTTP polling.
- Designed a MERN stack dashboard and a React Native mobile app (Expo) to display live parking slot availability — built RESTful APIs consumed by both clients with shared MongoDB collections for slot state and history.
- Led end-to-end development of the system, covering hardware integration, backend APIs, web dashboard, and React Native mobile app; deployed the backend on Render and the application on Expo Go. Live at parklith.vercel.app.

ShareBite – Food Sharing & Donation Platform | *MERN Stack*

November 2025

- Engineered a full-stack MERN application — designed RESTful API with 8+ Node.js/Express endpoints covering auth, listing CRUD, and donation lifecycle, all backed by MongoDB with Mongoose schemas and validation.
- Implemented JWT-based authentication with bcrypt password hashing, server-side protected route middleware, and persistent client-side session state — eliminating redundant re-authentication calls.
- Designed MongoDB schemas for users, food listings, and donation requests; optimized data retrieval using indexing and `populate()` for efficient relational queries. Live at sharebite-d393.onrender.com.

Personal Portfolio | *React.js, Tailwind CSS, Vercel*

April 2026

- Translated a custom design into a fully responsive UI using React.js and Tailwind CSS — built with reusable components and a scalable sections-based folder architecture for maintainability.
- Developed a serverless contact form using Vercel Functions integrated with Resend for automated email delivery while securely managing environment variables.
- Deployed frontend on Vercel and live at portfolio-lake-nine-37.vercel.app.

PROBLEM SOLVING

LeetCode

Solved 200+ DSA problems in Java — strong in arrays, strings, stacks, linked list
